 - (c) Notwithstanding (a) and (b) above, the Board has jurisdiction to consider and make recommendations on any matter relating to the application of the NNI Policy that is referred to it in writing by GN and NTI jointly.
- 18.14 Where the appeal filed with the Board does not fall within the jurisdiction of the Board the appeal may be dismissed by order of the Board without holding a hearing.

Special Provisions

The following section will form part of the contract.

1. The contract will be based on stipulated price. Use Appendix C.
2. The contractor is required to obtain a quarry use permit for the supply of granular material for this project. The geotechnical report by AMEC is appended to Section 02 of the specifications for your review. The report clearly indicates that the in-situ material will require processing (screening) to produce acceptable material for the project.
3. The Government of Nunavut has approximately 36 rolls of Bentomat Panel granular clay liner located in the Community and Government Services warehouse yard in Iqaluit. The manufacturer's specifications for this material is attached. The rolls were purchased in 2002 by the GN for use in Pond Inlet. These rolls are surplus from the Pond Inlet Project. The GN will make the rolls available for inspection during the tender period. Should the contractor select to use the GN owned material, the contractor will take ownership of the material, and warrant both the material supply and the installation of the liner as per the contract specifications. The GN will provide the liner at no cost. The contractor will be responsible for all shipping costs and make all arrangements to ship the material from Iqaluit to the project site.
4. The GN has applied for the project Water Licence from the Nunavut Water Board. The GN will not award the project construction contract until the licence has been received from the Nunavut Water Board.
5. The contractor will provide a Site Sign to be located at the entrance gate. The sign will be installed at the completion of the final inspection. The sign will be 1.2 meters by 1.2 meters. The language and wording of the sign will be provided by the owner.
