The attached report is a record of my visit to Cape Dorset and the information I obtained at that time.

A copy of the results of the laboratory analysis carried out on water samples collected at the truck fill point is also attached. Based on the parameters measured, the quality of the water is acceptable. For your information, I have also enclosed a general description of the parameters usually measured for drinking water quality.

If you have any questions or suggestions please contact me at 979-6369.

Yours truly

Peter Bannon  
Water Resources Officer
