RE: Notification of Decanting of Sewage Lagoon in Cape Dorset.

Dear Mr. Stewart,

The Nunavut Water Board ("NWB") acknowledges receipt of your letter of January 10, 2005 in which you inform the Board that Amendment No. 1, issued by the NWB on September 22, 2004, which authorized the disposal of sewage to the "Emergency Sewage Disposal Facilities", is no longer required since modifications to the original 3-cell lagoon have been completed as approved.

Although the NWB did not explicitly set a time limit or term in Amendment No. 1, it was understood that it would be valid until such time as the proposed work would be completed. Upon review of your January 10, 2005 letter, the NWB is satisfied that Amendment No. 1 is no longer required and consequently repeals it. As a result, the original terms and conditions of water licence NWB3CAP0207 with respect to the disposal of sewage are now back in effect.

Please do not hesitate to contact our office should you require clarification in this matter.

Regards,
