**Subject:** RE: Planned decanting of the Cape Dorset three tier lagoon

Mr. Stewart,

In accordance with the terms and conditions of your currently expired water license...

The Municipality of Cape Dorset is required to sample the discharge from the planned decant of the lagoon and to ensure that the samples are collected at the beginning, middle and end of their planned and scheduled decant process, these samples are to be tested at an accredited lab and the results submitted with the Municipalities annual report.

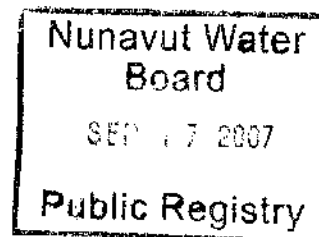

The Municipality is reminded that the parameters to be tested for, as outlined in the licenses are as follows;

Parameter	Maximum Average Concentration
Faecal Coliforms	1 x 10 <sup>6</sup> CFU/dl
BOD5	120 mg/L
Total Suspended Solids	180 mg/L
Oil and grease	No visible sheen
pH	between 6 and 9

Please do not hesitate to contact myself or this office if you require any assistance in completing this sampling or if INAC can be of any assistance in this process.

Sincerely,

Andrew Keim  
Water Resources Officer

Andrew:

The required samples will be taken as outlined below. A copy of this requirement has been forwarded to Mmike Hayward, our Director of Municipal Works.

Art
