July 14, 2010.

Sub: Application for commissioning 2007 Sewage Disposal Facility-P Lake Sewage Lagoon at Cape Dorset under Water License # 3BM-CAP 0810.

Dear Ms. Beaulieu,

I am writing you to confirm that the requirements of Part H, item 6 and item 7 under the Water License # 3BM-CAP 0810 have been completed and attached herewith the Temperature validation report prepared by AMEC, the Geotechnical Consultant for approval.

We have also completed design for the monitoring wells and planned to construct those early summer this year. The design and drawings prepared by AMEC, the geotechnical consultant, is attached for your information.

In these circumstances we are asking permission to commission the 2007 Sewage Disposal Facility at P lake on August 01, 2010. During the operation of this facility, one of the three cells will be kept active for emergency.

The final O&M manual will be submitted within 90 days of approval for commission.

I also like to confirm that the minor repairing works to the access road will be carried out by July 2010. It means the community of Cape Dorset will be ready to operate the new facility starting from August 01, 2010.

Your early response will be highly appreciated.

Thanking you,

Bhabesh Roy, M.A.Sc., P.Eng.
