Quarry Permit

lication.wpd (39 application.wpd ..

Thank you for your response.

I have attached an Application for Land Use Permit for your use. If the extension is not accepted through our process than we would request that you re-submit an application for this activity. If the extension is accepted, than we would have the application process started for future work in the area so that there is no interruption in doing the activity.

With the regulatory process as it is, it would be better to plan ahead as I realize that this activity will be ongoing for some time yet.

Also, as only a reminder, your Water License expired in February and the Nunavut Water Board would like you to contact them for an amendment to the expiry date of your permit with them.

Regards:

John G Craig

Hi John,

This Land Use Permit has a contact person on file as being Bryan Purdy, I believe is currently on disability, and he would have had a lot of information pertaining to this file.

I have requested the information from his division, of which I hope to receive soon.

Once I have this information, I will forward it to your office.

Should you have any further questions or concerns regarding this matter, please do not hesitate to contact me.

Thank you,

Brian Tattuinee

Subject: Chesterfield Inlet

We recieved a question from the Nunavut Impact Review Board (NIRB) with respect to your extension request.

Is the extension of the road to the gravel source 3.5 km long and is the route still the same, we will require an updated map of the road and all borrow sources (where you get the gravel from to build the road), if you can provide that I will forward off to NIRB for their information.

Thank you

John G Craig
