Steven,

As per our talk today, Please proceed with your emergency Decant of the sewage lagoon to protect the integrity of the berm walls.  
As noted please record and submit the volumes discharged to the environment ( the new lagoon is not yet ready).  
Please collect and submit for analysis the required samples and submit to the Inspector and the NWB your results from the lab.

Thanks very much

Hi Andrew,

The sewage lagoon once again is approaching the freeboard limits, we need permission to decant it as soon as possible, Bill Buckle has left and won't be returning, he has left us with a few headaches to take care of. I need to know the steps we have to follow in order to decant our existing lagoon.

Thanks

Steven Aipellee
