Re: Results of Analysis of Water samples from
Water Supply, Clyde River, March 13, 1984

Attached is a copy of the analytical results from samples collected from Clyde River's Water Lake on March 15, 1984. Based on the parameters measured, the water is of an acceptable quality. I apologize for overlooking sending these results to you earlier.

If you have any questions or comments please contact me at 979-6369.

Yours truly
