

VIII. PUBLIC HEALTH *(To be filled by the Regional Environmental Health Officer)*

1. Date: February 27, 2001
2. Municipality: Clyde River
3. Contact: (Environmental Health Officer Contact) Bonnie Segal

Telephone #: 867-979-7656

Fax #: 867-979-7659

4. Have there been any problems or health/environmental concerns with drinking water?

☐ Yes ☒ No

If yes, describe

5. Have there been any problems or health/environmental concerns with sewage disposal/treatment?

☒ Yes ☐ No

If yes, describe

The lagoon appears to reach capacity quickly during the year and by the beginning of the summer there is minimal freeboard. The potential for breaches in the structure to occur is a concern. There is an obvious need for expansion of the lagoon capacity and an investigation into the integrity of the berms.

6. Have there been any problems or health/environmental concerns with solid waste disposal?

☒ Yes ☐ No

If yes, describe

Only minimal segregation of waste is occurring at the solid waste disposal site. Open burning at the site occurs regularly and often contains items that should not be part of the burn such as plastics. There is no provision for the separate safe storage of hazardous waste at this solid waste site. There is the potential for hazardous materials entering the burn pile. Waste is often blown off site due to the inadequacy of the fencing. The fence should enclose the facility.

Monitoring Program

1. Does the Regional Health Board perform water quality sampling?

___No ☒ If yes, answer questions (a) to (e)

- a. Briefly describe the sampling methodology.

Membrane filtration method is used to examine the potable water supply for total coliforms and E. coli.

- b. Briefly describe any monitoring of wastewater effluent and leachate.

None

- c. Who is responsible for sampling?

The samples are collected by the operator of the water system and submitted to the Environmental Health Office on a monthly basis.

Name:

Position:

Telephone #:

Fax #:

Level of training:

- d. Recognized laboratory performing analysis of samples.

Name: Environmental Health Office
 Health & Social Services, Baffin

Address: P.O. Box 1000, Station 1046

Telephone #: 867-979-7656

Fax #: 867-979-7659

- e. Are any changes planned in the water quality monitoring program?

___ Yes ☒ No

If yes, describe.
