Sub: Response letter to NWB: Clyde River Sewage Lagoon

Dear Ms. Phyllis,

We have received comments on our design submission of Clyde River Sewage Lagoon from BGC on June 16, 2008 and from INAC and GN-DOE on dated June 19, 2008 through NWB. Our consultant worked on the comments, prepared a draft O&M manual, a response action plan on the comments and revised the geotechnical report as well. Please find attached our revised submission in electronic format which attached the following documents:

- 1. Response action sheet
- 2. Draft O&M manual
- 3. Revised Geotechnical Report

On February 29, 2008, we applied to amend the existing water license of the Hamlet of Clyde River. The process is taking long. Therefore we now request to amend and renew the water license at the same time for five years from the date of September 15, 2008.

This submission is only for the sewage lagoon project. Water supply and Solid waste management are unchanged at this moment because they are not part of our current Capital program.

Department of Community Government Services Ministère des Services communautaires et gouvernementaux

We trust that this will satisfy your requirements. Your early approval will help us starting the construction of the project, considering the emergency experienced during this summer.

Thanks.

Bhabesh Roy, M.A.Sc., P.Eng.
