Subject: Water License 3BM-CLY 0909-Hamlet of Clyde River-
Submission of Waste water facility **Final Operations and Maintenance Manual**- Qikiqtani Region

Dear Ms. Beaulieu:

In response to your e-mail dated June 27, 2012; we are submitting the final Operation and Maintenance (O&M) manual, Volume I and II, for the entire sewage treatment facilities of the Hamlet of Clyde River. This document will provide the guidelines to operate the new sewage lagoon built in 2010 and the old sewage lagoon rehabilitated in 2011. Each cell is treated as a standalone facility and can function independently.

I like to clarify that the initial submission received by NWB dated May 30, 2012 was a draft manual only prepared for the new sewage Lagoon built in 2010.

Please accept this final Manual in a "CD" designed for both the facilities. Hard copy will follow some time at the end of this month.

Both the facilities are in operation. If you have any comment or question on this final manual, those will be accommodated as a revision of this document.

If you have questions or concerns, please contact me at any time.

Sincerely,

Bhabesh Roy, M.A. Sc., P.Eng.
