To David Stockley, SAO, Hamlet of Gjoa Haven

Hello David,

Attached you will find my Inspection Report for the Hamlet of Gjoa Haven's Municipal Water License 3BM-GJO1318. I did the Inspection on July 11, 2017 and I was accompanied by Shah Alam with GN CG&S and Adam Halluqtaliq and Dominique Qirqqut from your staff. I apologize for the delay in getting this report to you.

My main concern is that your Water License will expire this year. I strongly encourage you to start the process of renewal with the Nunavut Water Board if you have not already done so.

Your main Garbage Dump has many large piles of un-burnt garbage that is a threat for an unwanted accidental large fire. As we discussed when I was in Gjoa Haven I recommend you do a regular controlled burn using a "Burn-Box" type system used in other Kitikmeot Communities. If this is done on a regular basis it will keep your Dump at a manageable size.

From my report you will also see that Signage at multiple Sample Stations either needs to be moved to other locations or new Signs installed where there are none.

Lastly, Daily and Monthly Records need to be kept of how many Sewage Truck Loads are dumped into the Sewage Lagoon in order to keep track of Annual Quantities for inclusion in your Annual Report.

I would like to thank you and your staff for your co-operation and assistance during the Inspection Process.

If you have any questions or concerns, please feel free to contact me at any time.

I have copied this to the Nunavut Water Board for their information and files.

Koana,

Baba
