To Dave Stockley, SAO, Hamlet of Gjoa Haven

Hello Dave,

Attached you will find my Inspection Report for the Hamlet of Gjoa Haven's Municipal Water License 3BM-GJO1318. I did the original Inspection on July 13, 2018 and I was accompanied by Sabrina Karnouk and Laura Kim from Environment Canada as well as Shah Alam with GN CGS. Anthony and Dominique from your staff took us around for the Inspection. I also did a follow up Inspection on July 27, 2018 by myself and just Anthony from your staff took me around for this. I apologize for the lateness of my Report.

My main concern was that your Water License is set to Expire this year, but I have been made aware that you have already contacted the Nunavut Water Board and started the process of renewal. I encourage you to see the renewal process through in a timely manner in order to remain in compliance.

During my initial Inspection I gave you directions to repair the Breach in the Garbage Dump Berm as well as to relocate Sample Station GJO-4 to better reflect the Final Discharge Criteria in your Water License. I am very pleased that your staff were able to correct both of these by the time I did my follow-up Inspection on July 27<sup>th</sup>.

There are few other items that require your attention in the Inspection Report.

I would like to thank you and your staff for your co-operation and assistance during the Inspection process.

If you have any questions or concerns, please feel free to contact me at any time.

I have copied this to the Nunavut Water Board in Gjoa Haven, GN CGS in Cambridge Bay and CIRNAC in Iqaluit for their information and files.

Koana,

Baba
