Re: Hamlet Complex Exterior Fuel Storage Tank

Raymond:

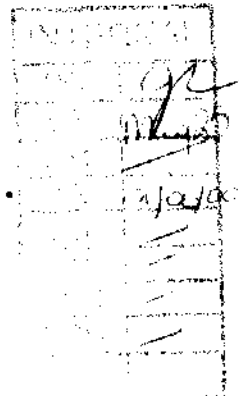

Attached is a quote for a replacement fuel tank for the Complex. For removal of the existing tank, cleanup of the site, a new gravel pad and installation of the new tank you will be looking at 8000.00 - 10000.00 . So you'll require a budget of approximately 20000.00 for the project.

The existing steel tank is 16 years old and could rot through at any time. If this was to happen you'll be faced with the above costs plus the costs of the spill cleanup and air freight to get a tank in here which would double the project cost.

Please let me know how or if you wish to proceed with this.
