RE: TEMPORARY BERM.

Today your town foreman came by my office, and asked me to drive to the local town dump. Upon arrival to the site he show me the temporary berm that was built just for that clean up to Swan Lake fuel spill that happen few years back.This was not meant for storing waste oil and other contaminated drums.

The berm was built by a contractor who was APM or CAP enterprise at the time with supervisor from CGS in Cambridge Bay.

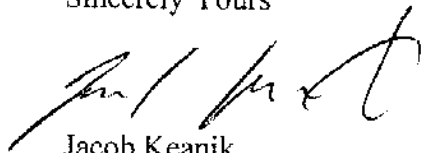

This berm wasn't built right in the first place which is causing some concerns.

- No proper material was use to built the berm.
- It should not be use for waste oil, and other contaminates.
- It too small, and is over loaded with drums.
- Some drums are leaking and not standing up right.
- Need proper cleaning with someone with good supervising.

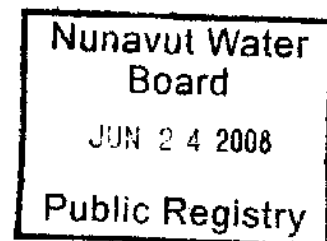

This has to be clean up ASAP before it get worst and run out of the berm. You as the Hamlet will need some one from CGS or who every could give your staff a hand on this clean up.

Will continuing to monitor the Clean until I'm please with clean up.

Sincerely Yours

Jacob Keanik
