Anthony;

The Hamlet of Gjoa Haven recently was granted a Water Licence from the Nunavut Water Board. Under the Terms & Conditions of the Licence the Hamlet is required to provide a detailed report to the Nunavut Water Board of any/all spillages of chemicals, fuels and other hazardous goods within the municipal boundaries.

Last week you had a significant spill (approx. 4000 liters) in the yard at the tank farm. We require a detailed report on the spill at your earliest convenience. In particular the cause of the spill, the area the spill covered, Petroleum Products Division involvement in containing, clean up of the spill and disposal of the contaminated soil.

Please insure that your driver(s) and tank farm employees know that any/all spills must be reported to the Hamlet immediately so we can work with R.W.E.D. to clean them up quickly and effectively.

Thank you for your co-operation.

E. Rudolph
