Good morning Shah,

As you can see the AANDC - Water Resources Division has raised questions needing to be addressed with respect to the Abandonment and Restoration of Gjoa Haven old sewage lagoon.

It would be appreciated if you submit your responses and clarifications directly to the AANDC and NWB.

Regards,

Karén Kharatyan, Ph. D- ԵՂՁ ԵՏՈՂՁ

Hi Shah,

Thanks for your reply. From my understanding the A&R Plan includes the option of sludge being removed? And it seems this is the option you are pursuing. I am cc-ing AANDC Water Resources with this message as they had questions specifically with respect to the sludge removal. I believe the amendment or additional information stated in your message would be needed to be included with the A&R Plan for the Board approval as i don't really see the Board approving a specific A&R Plan and requiring an Amendment for it.

And thanks in advance for additional inf with respect to Taloyoak licence application.

Good morning Karen,

Thank you for updating me the A&R plan. We have discussed with Andrew this morning and very much in the same phase of following the Plan what submitted, with returning back those materials and stockpile in the previous Lagoon in one side and pushing sludge towards the other side. Then those sludge will be monitored, sampled, tested for compliances of wastewater and sludge-soil parameters.

The sludge contained area can be retrofit for future sludge drying pad for new lagoon - an amendment to this A&R plan will be carried with a drawing signed and stamped by P.E. You will be updated once completed the drawing and amendment. That's all technical aspects have discussed and concluded. Unfortunately, Gary Strong wasn't in the discussion- myself and Stuart was in the discussion with Andrew.

Note: **I will forward you the respond letter, explanation and full compliance Plan for Taloyoak by today anytime – I couldn't complete it yesterday.**
