Clyde River*

Dear Mr. Armstrong;

Re: Sanitary Site Clean-up; Broughton Island and Clyde River
Sewage Disposal Improvements; Grise Fiord.

References: Your letters dated September 14 and 15, 1993.

1. I have reviewed the above noted reports on behalf of the DIAND District Office and have the following comments to make:

Sanitary Site Clean-up; Clyde River and Broughton Island

2. I have no concerns with the proposals as presented in the reports prepared by MM Dillon, July 1993.

3. These sites obviously require to be reclaimed. I believe that the proposals offered within these reports offer the most practical and expedient methods to deal with these abandoned waste disposal sites.

Sewage Disposal Improvements; Grise Fiord

4. The current facility is in obvious need of upgrading or replacement. The proposal made by UMA to improve sewage disposal facilities are encouraged by this office. We have no concerns with this proposal.

Sincerely,

Paul Smith
Water Resources Officer
Baffin District

Re: Sewage Disposal Improvements; Grise Fiord

Ref: Our conversation 28 September, 93.

1. As mentioned, here is a copy of the plans for the sewage disposal improvements for Grise Fiord.
2. I have reviewed these plans and have no specific concerns.

Regards,

Paul Smith
Water Resources Officer
Baffin District
