Dear Mr. Johnson,

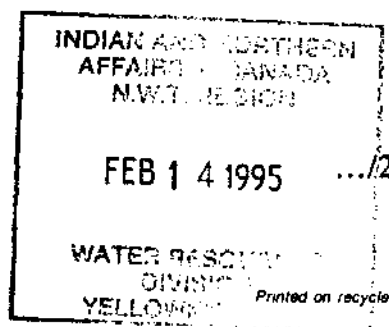

Re: Grise Fiord Sewage Disposal Improvements
 Design and Operations Report - November 23, 1993

*Grise Fiord
Hvetté*

Ref: Your memo and request for comments dated January 23, 1995.

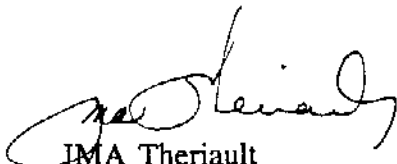

1. Thank you for providing our office with a copy of the above noted "final" report.
2. This office has, in the past, provided a review of the "draft" report. These comments, along with others generated through the efforts of the Water Board were consolidated in a letter to Eddie Gordillo, P. Eng. GNWT, dated December 1, 1993.
3. It is further noted that you responded to this letter on behalf of Mr. Gordillo on January 3, 1994 and addressed those concerns. The Water Board, in a letter dated January 28, 1994, was satisfied that their concerns had been addressed.
4. As the basic design concepts have not changed, with the exception of utilizing the "freezeback" concept instead of a liner within the berms, this office has no concerns as long as this technique will still allow for seepage of treated effluent and will not jeopardize the integrity of the berms.

Canada

5. If you have any further questions, please do not hesitate to contact Paul Smith, District Water Resources Officer, of this office at your convenience.

Sincerely,

A handwritten signature in black ink, appearing to read 'JMA Theriault', written over the printed name.

JMA Theriault
District Manager
Nunavut District
