Good morning Bhabesh,

I'm following up on an inquiry you had made a few weeks ago with respect to the hamlet of Grise Fiord and their need to expand their current water reservoir (glacial runoff pond) to supply the hamlet with fresh water (surface snow melt/runoff).

I had an opportunity to check with our legal counsel and the recommendation i received was that if the work required does not include the construction of dikes/berms/dams etc (you've indicated that it would simply be a 'dug-out' or depression, and that the amount of water to be diverted would not be in excess of the current licence authorization amount of 7,700m3/year (an amendment to the volume would be required), then a 'Notice of Modification' would be the requirement under Part E, Item 2 of the current Licence 3BM-GRI1520.

If you require additional information, please feel free to contact the undersigned at your earliest convenience.

Regards,
