Subject: Hall Beach Sewage Lagoon

Hi Phyllis,

Further to our telephone conversation of yesterday, I would like to advise you that SAO from Hall Beach informed us that the Lagoon is seeping. The extent of the leakage is not known at this time. We have already contacted the Contractor (Kudlik Construction) to look at the situation. The Contractor is in town working on another project and has assured us to correct the situation, and will start working promptly, once we have assessed the situation and finalized the plan of action. We will keep you posted.

Best regards,

Malli Aulakh, M.Sc. Eng., P. Eng.
