Re: Beach Erosion, Hall Beach, NU

Dear Mr. Elsayed

Further to your request, we are attaching a copy of the sludge profile for the Hall Beach Sewage Lagoon. We contracted the Environmental Sciences Group (ESG) of Kingston, ON to perform the tests since they were working at the radar site on the DEW Line Cleanup project at the time.

The sample was tested for heavy metals and we trust that the results meet with your satisfaction. If you require any additional information, please do not hesitate to give me call.

Yours truly,

David Mosher, P. Eng.
