Cc: Licensing Department <licensing@nwb-oen.ca>

Hi Bhabesh

Thank you for the submitted information related to 3BM-KIM0911. I have reviewed the submission and found that there are a few pieces of information still missing.

1. QA/QC Plan:
 - a. A letter from the laboratory confirming their acceptance of the QA/QC Plan, similar to the one provided for Cape Dorset (attached for reference),
 - b. Errata outlined in ECCC comments that still need to be addressed:
 - i. Section 1.4, "condition 20 of Part H" should read "Condition **11** of part H";
 - ii. Section 1.7, CALA refers to the Canadian Association for Laboratory Accreditation, formally known as the Canadian Association of Environmental Analytical laboratories (CAEAL)." – This should be "**formerly**". This error is also in section 3.1.
2. Waste Water O&M Manual:
 - a. Section 3.4.4 is still unclear with respect to monitoring frequency and the number of site monitored. It indicates daily monitoring and sampling of multiple sites, but elsewhere in the plan it indicates that sampling at KIM-3 once a month is the practice. Please clarify this section.
 - b. Please provide the coordinates of the sewage discharge location "In the event of any disruption of services, due to blizzard or truck breakdown"
3. Solid Waste Management Plan
 - a. Open burning was recommended by ECCC to be minimized, but in the Plan it is recommended to occur weekly, please update the plan accordingly,
 - b. As recommended by CIRNAC, the Plan should indicate that hazardous waste should be segregated and placed into secondary containment, that the landfill should be bermed, and that signage and fencing be put in place.
4. Please confirm that you are okay with the 30,000 cubic metres water use limit for the next 10 years.
5. Could you provide an annual report for 2016, that includes water use volume.

Please provide the requested information by **March 27, 2019**, or indicate when it will be submitted.

Thank you,
Derek
