---

Finance and Administration Committee held their meeting on July 20, 2011 and there is continuing concern of fishing lakes and shoreline fish maybe impacted is and when the waste water from sewage lagoon is up and running which there maybe possible over flow of sewage lagoon right to our water source and fishing lakes and shoreline fish in our community.

They are wondering if there is going to be monitoring conducted before and during the use of Sewage Lagoon. To our knowledge that has never been done up to now and the project is being conducted without survey of depth of the lagoon.
