

LANDFILL PERIMETER BERM

Diagram illustrating the cross-section of a landfill perimeter berm. The berm is constructed from native material excavated from the landfill footprint. The berm has a crest width of 3.0m and a height of 2.0m. The slope on the left is 1:3, and the slope on the right is 1:2. A fence is located on the crest. The existing ground level is shown as a dashed line. The berm is 6.0m wide at the base. The total width of the landfill footprint is 10.0m (6.0m + 4.0m). The existing ground level is 0.5m above the base on the left and 1.0m above the base on the right. A 1m excavation is indicated on the right side of the berm.
