Kugluktuk Water Licence: 3BM-KUG 0914

Clarification/Addendum

April 06, 2015

Nunavut Water Board

P.O. Box 119

Gjoa Haven, NU X0B 1L0

RE: 3BM-KUG0914 Kugluktuk Water Licence, Part H, Monitoring Stations

Ref: O&M manuals of Sewage and Solid waste and Water Licence 3BM-KUG 0914

Dear Ms. Phyllis,

We refer to the request by Sonia Aredes, P. Eng. on March 23, 2015, clarification in conjunction to the Monitoring Stations outlined in the O&M manual and in the currently expired Licence 3BM-KUG 0914. We would like to update monitoring stations with addendum to the O&M manual as follows:

- *Additional monitoring stations identified as KUG 2A, KUG-3A, KUG-4A, and WS-1 through WS-4 will no longer be active. These additional monitoring stations were mainly identified in connection to the old sewage lagoon decommissioning study, monitoring and sampling purposes which were completed before the year 2014. A request was submitted to the Board for the old sewage system decommissioning (A&R plan).*
- *Location of monitoring stations KUG-1, KUG-2, KUG-3, KUG-4 and KUG-5 were marked with GPS locators and amended (exact locations of KUG-3 and KUG-5) by AANDC inspector during the visit in Aug 2014. The Licensee is ensuring to follow up this amendment and continue to annual monitoring and water/effluent sampling as indicated in the Licence.*
- *The licensee is updating the Board with the monitoring stations as identified in the currently expired Licence as described here:*

Department of Community and Government Services
