#### Post Closure Phase (if applicable)

From:  To:

#### Please specify dates

☒ Annual ☐ Seasonal

From: 2020-12-08 To: 2030-12-07

### PERSONNEL

Current Water Licence 3BM-KUG 1520, Type B, issued by the Nunavut Water Board to the Hamlet of Kugluktuk (the owner) on December 08, 2015 for five (5) years with the expiry date December 07, 2020 to intake raw water and supply potable water to the resident after treatment process and deposition of sewage waste, solid waste and metal waste to designated facilities including temporary storage facilities for spill and contaminated soils. The water treatment facility is closer to the community and raw water transport from intake pumphouse(s) 200-400 m away from treatment plant through a buried line and vaults. The two intake pump houses are operated by grid power line with backup. Heat trace lines are inside the insulated HDPE pipeline that keeps the water to a minimum 50C and above before
