Hi Bryan.

I passed on the only letter I have seen. The NWB directs requests to the licence holder as a matter of standard operating practice. I believe that the NWB was finally responding to my letter to Jim Wall. Since that time you submitted a completed application.

As you know Jim has left the NWB and his files are being handled by others.

When I questioned the NWB what happened to the application you submitted they were first unaware of it and then I was informed that it was the wrong form, and that there was a new supplementary form to complete.

I completed the forms as we had done before as we had the mapping and GPS coordinates requested and then forwarded to you for submission to the NWB on the community's behalf. I believed that I was following the correct procedure.

I apologize for any misunderstanding on my part.

Ron

Ron and Walter I am certain you both aware we (CGS) completes all Nunavut Water Board applications for the Hamlets including the Hamlet of Repulse Bay Therefore please copy this office with all

requests from the water Board for new applications

It would be appreciated if this could be done immediately

Hi Bryan,

I received a letter to Ron Ken, P. Eng. in Yellowknife from the Nunavut

Water Board explaining that the Hamlet of Repulse Bay needs to fill out

a new application for a water licence in order to consider this project.

We also have to complete a Supplementary Information Requirements for Hydrocarbon-Impacted Soil Storage and Landfarm Treatment Facilities - help!

I'll send you a copy of it by fax.

Thanks.

Imelda
