

Project Description Contaminated Soil Site Storage Repulse BAY

This project involves the construction of Site 18 Metres by 18 metres with and 0.3 high berm on the perimeter of this 18 metres x 70 metres to contain contaminated soil.

The contaminated soil will come from the petroleum products bulk storage area of Repulse Bay

The soil contaminated area will located in the vicinity of the existing solid waste site used by the Hamlet of Repulse Bay on ground that gently slopes to the south and easterly direction.
