Hamlet of Naujaat Water Licence No. 3BM-REP1520 Amendment/Renewal Application

Executive Summary

This application is being submitted to the Nunavut Water Board (NWB) by the Government of Nunavut, Department of Community and Government Services (CGS) on behalf of the Hamlet of Naujaat (previously Repulse Bay) for the Amendment/Renewal of Water Licence No. 3BM-REP1520 for changes to several conditions of the original licence. Changes from the previous licence include: land use changes to the sewage drop off area and inclusion of a lagoon into the sewage treatment train. There are also future plans to expand or move the solid waste disposal facility which documentation and correspondence will be provided when available. The Hamlet is seeking a 5-year renewal of the previous water licence, which would be valid to the end of 2025.

The work planned at the Sewage disposal site includes a pre-treatment lagoon, located northwest of the current sewage drop off area. Effluent will be pumped from the lagoon annually to receive secondary treatment from the existing wetland system. Drawings for this project can be found attached.

The Water Treatment Facility and Solid Waste Disposal Facility currently do not have any changes. A new Solid Waste Disposal Facility is expected in the future.
