Subject: REP-0409 Clarification

To: "Lusty, Megan" <MLusty@gov.nu.ca>

Cc: Phyllis Beaulieu <phyllis.beaulieu@nwb-oen.ca>

Hi Megan,

Everything for the renewal/amendment application for licence REP-0409 appears to be in good order. Before moving forward with issuing the new licence, however, I would appreciate clarification on a few items:

1. In regards to licence item C4. The intake pipe shall be equipped with a screen mesh which conforms to DFO guidelines. The ANND C Report 2011 listed the intake screen as "Unacceptable", with no further clarification. Also, the licensee has not commented on this issue in any annual report. It is suggested that the licensee verify that this screen is in good working order.

2. In regards to licence items D11 and D12, the Board does not have any O&M plan for the landfarm facility on record nor any sampling results of effluent discharged. Was an O&M plan for the landfarm submitted? Also, pursuant to item H12, it is not clear whether the licensee installed the groundwater monitoring wells associated with the landfarm facility.

3. The 2004 Annual report indicated that old solid waste site was abandoned and remediation efforts would occur. What is the status of this remediation?

4. The 2013 Annual Report stated that a study on water quality survey on existing water source and also proposed secondary water source to be done by William Engineering Ltd in 2014. What is the status of this report?

2/2
