**Re: Proposed Upgrading to the Pangnirtung Sewage Disposal System**

Dear Ms. Filiatrault,

I am forwarding to you the design drawings and specifications for the sewage disposal system in Pangnirtung, Nunavut. Please review them and distribute to the various stakeholders for their comments. The Hamlet of Pangnirtung's water license Part C, Item 4 require a review by the Board prior to construction implementation.

It is proposed to go out to Tender on or about July 15,2000. If we have a successful bidder, the construction should get under way the third week in July and continue until weather stops work for the year, usually no later than Dec 30, 2000.

This will be a two year project with completion by March 31, 2002.

The Hamlet of Pangnirtung has requested that we make the submission of the Upgrade Proposal to NWB on their behalf.

It is hoped that the review can proceed in a reasonably timely manner so that there won't be any delays in construction start up. Will you please keep me advised as to the status and progress of the review. I can be reached at the following:

Phone (867) 975-6442

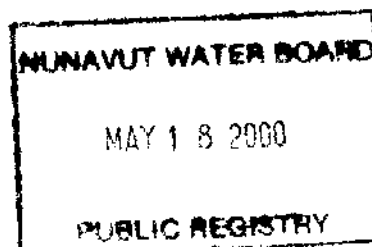

Fax (867) 975-6454

E-mail:

dparker@gov.nu.ca

Sincerely yours,

David H. Parker, P.Eng.
