- 0568. - DISTRICT HOLD.

In one of our council meetings, some council members were concern $\omega.B.$ about our water supply.

We have three rivers that flow to our water supply. One of them is coming from Dew Line lake about 7 miles south east from Pelly Bay.

Some people are saying that in early 50's when they dew line people were just starting they use to dump waste and metal on the ice, and as far as we know they are sitting at the bottom of the lake.

Also their garbage is on top of the hill and it also flow down toward the lake.

Last week we sent a water sample, and soon as we get some reply on it we will try to let know.

But incase I forget to write to you, please call me at 403 769 - 7281

Your sincerly,

Guido Tigvareark S.A.O.
