Subject: Filling of a pond in Kugaaruk

Hello Zhong,

I am the new community planner for the region. I am not sure who I need to talk to but I thought I would start with you. I have a file here where we are proposing to fill a pond/lake in Kugaaruk in order to create a lot that will accommodate a NHC 5-plex. Someone made several notes on the file including the need for NWB approval.

I am writing to find out if we need your approval and if so what the process is for obtaining that approval. I am aware that I need an Order In Council as well and I am working on that. Does one need to be obtained before the other or can I do the applications concurrent to one another? Do I also need DFO approval as well?

Thank you and any information you can provide would be appreciated.
Cheryl
