**RE: NWB FILE # 3BM-PEL0712 – Hamlet of Kugaaruk Spill Plan for Sewage & Solid Waste Sites**

Dear Mr. Dwyer:

The Government of Nunavut, Department of Environment (DOE) has reviewed the Spill Plan for the Sewage and Solid Waste Sites for the Hamlet of Kugaaruk. The DOE has the following comments and recommendations based on the *Environmental Protection Act*.

## GENERAL

The Spill Contingency Plan should include:

- An inventory and the location of response and clean up equipment available to implement the plan. This includes your equipment as well as any to be used by another person responding to the spill on your behalf.
- A detailed site map that is intended to illustrate the facilities relationship to other areas that may be affected by the spill. The map should be to scale and be large enough to include the location of your facility, nearby buildings or facilities, roads, culverts, drainage patters, and any nearby bodies of water.

The DOE thanks the NWB for giving us the opportunity to review and provide comments on this submission from Dillon Consulting Limited, on behalf of the Hamlet of Kugaaruk. Please contact me if you have any questions or comments.

Sincerely,
