 Subject: FW: Lagoon upgrade at Pond Inlet

> Hi Jim,  
 > Given the short turn-around time requested I offer the following comments  
 > for consideration by the Nunavut Water Board. There will not likely be  
 > any  
 > significant effects on fish habitat associated with the construction of  
 > the  
 > sewage lagoon. However, I have several questions pertaining to operation  
 > of  
 > the lagoon:  
 >  
 > 1. What are the predicted Total Suspended Solids discharge levels? What  
 > mitigation measures will be implemented to ensure TSS does not become  
 > elevated above recommended thresholds?  
 > 2. What is the proposed retention time for sewage in the lagoon?  
 > 3. Will the retention period allow adequate time for aerobic and  
 > anaerobic  
 > degradation of pollutants, such as ammonia?  
 >  
 > I do not see any problem with advising the proponent to proceed provided  
 > that this information can be provided to DFO-FHM if requested to do so.  
 > It  
 > is the proponents' responsibility to avoid contravening Section 36(3) of  
 > the  
 > Fisheries Act.  
 >  
 > Regards,

 >> Good evening:  
 >>  
 >> Please find attached a series of engineered drawings, as well as a cover  
 >> letter describing proposed construction at the Pond Inlet Sewage Lagoon.  
 >> The NWB is accepting written concerns and comments with regards to this  
 >> project before August 27, 2002. Thank you in advance for your quick  
 >> response to this request. Please accept my apologies for any  
 >> inconvenience that may result from the tight timeline for requested  
 >> response, which is necessitated by the limited time available to the  
 >> Hamlet for construction.  
 >>  
 >>  
 >> Sincerely,  
 >>
