**WATER LICENCE INSPECTION - JULY 22, 1996**

---

Thank you for your memo dated August 15, 1996.

In response to your concerns for the following:

1. New site is scheduled to be fully operational by 1997.
2. Waste oil berm will be drained annually, upon snow thawout and disposed to the new Sewage Lagoon with a Sewage Truck.
3. Hazardous Waste Sealift container will be placed once the new site is completed.

I hope this answers your concerns. Should you have any other questions or concerns, please feel free to contact me at 899-8935.

Yours truly,

Jake Anaviapik.  
Senior Administrative Officer
