Re: Letter dated July 13, 2001

Dear Ms. Katsak,

In your letter dated July 13, 2001 you request approval from the Board to use Salmon Creek as a water source. Under the current water licence NWB3PON9904 Part C, Item states:

"The Licensee shall obtain all fresh water from Salmon River/Reservoir using the Water Supply facilities or as otherwise approved by the Board."

Therefore you have approval from the water Board to use Salmon Creek/River as a source. The NWB requests that every precaution be taken to ensure that petroleum, oils and lubricants are prohibited from entering the source. The NWB shall be notified on any changes in operation. Additionally, the Board recommends that Doug Sitland, Manager Capital Programs with Community Government and Transportation be notified of the operating problems and updated on the measures proposed to rectify the problem.

If you have any concerns or questions, please do not hesitate to contact me at 867-360-6338 or by 867-360-6369 or by email at dionne@polarnet.ca

Sincerely,

ORIGINAL SIGNED BY
