

HAMLET OF POND INLET H424 FALCET

Nunavut Water Board P.O Box 119 Gjoa Haven, NU XOE 1J0 July 13, 2001

To Whom it May Concern,

The truck fill station at our water lake has been broken for a while, so we have been pumping straight from the lake. Two of our five water trucks were leaking oil on top of the ice. We cleaned up the oil before the ice melted. The trucks are not leaking anymore.

We are wondering if we could pump from the Salmon Creek instead of the water lake, just to be on the safe side. Please advise.

Sincerely,

Mona Katsak

Water and scwer clerk.
