Hi Bhabesh

In response to the attached notice to remove sediment and the stuck pump and associated sediment from Water Lake Reservoir. The activities fall in line with Licence terms and conditions and do not require an amendment or approval.

Please be advised that sediment and erosion control measures should be implemented to prevent sediment suspension and increasing TSS levels, and that necessary monitoring of water quality should also be conducted. This information can be included with all other construction activities summarized in the 2020 annual report.

Regards, Derek
