Re: Direct Water Pumping From Stream

Dear Ms. Beaulieu,

The Municipality of Qikiqtarjuaq just discovered a leak in our liner within the community water resivour. We must drain the resivour asap, so the repair can be completed in a timely manner, to allow us to refill the resivour, before freeze-up.

This letter is to inform you that the municipality will have to fill their water truck directly from the stream we use to fill the resivour. The drawing water directly from the stream will start within the next week and continue until the repairs are complete. This is expected to take about 3 weeks. Once the repairs are complete we start our annual resivour refilling. I will send you a complete report on the volume of water dawn from the stream and the time the entire project took.

If you require additional information please contact me at 506-832-3273 or rcvhnb@nb.sympatico.ca. I expect to be back in Qikiqtarjuaq around the middle of September.

Sincerely,

Rick Van Horne, SAO
