Phyllis Beaulieu Manager of Licensing Nunavut Water Board P.O. Box 119 Gjoa Haven, NU X0B 1J0

Dated November 12, 2008

Subject: Hamlet of Qikiqtarjuaq Water License Number: 3BM-QIK0712

Dear Phyllis,

I am writing you regarding the conditions of the Current Hamlet of Qikiqtarjuaq Water License and status of the construction of the Municipal Infrastructure.

The current Water License covers Water supply system, Wastewater treatment by Lagoon, Solid waste management by Landfill and Contaminated soil remediation by Land farm. Currently construction of the facilities is in progress.

During the construction of the Water Reservoir, the Hamlet used to extract drinking water directly from the existing natural stream and manually chlorinated following the guidelines of GN-DOH-Health officer. The Stream is now freezed up and there is no other alternative drinking water source available in the Community. The construction of Water Reservoir was completed at the end of last summer. But the dispensing system will be completed next year. At this time, some parts have been upgraded in order to be operational for this winter.

Under these circumstances, the Hamlet of Qikiqtarjuaq has started using the Water Reservoir and the existing Water truck fill station just at the beginning of this winter. Water sampling and testing program are adequately replaced in order.

Once all the components of the project are completed, updated and final O&M manuals together with the as built drawings will be submitted to your office. The construction and renovation to all the facilities under the contract have been granted an extension due to GN financial constrains. The new date of completion is November 2009.

If you have any question, please do not hesitate to contact me at any time.
