Mr. Antonio Masone  
Senior Administrative Officer  
Hamlet of Rankin Inlet  
XOC OGO

Dear Mr. Masone;

Re: Meeting of March 17, 1997 - Water Licence N6L3-0779

1. I would like to thank you for the opportunity to meet and discuss the various compliance issues of water licence N6L3-0779.
2. As a result of this meeting I feel confident that the various outstanding issues that require to be addressed will be done so in a timely manner.
3. As discussed at the meeting, it is the Hamlet's responsibility to call upon those representatives to DPW and MACA to assist in the provision of information to those aspects of the licence that the Hamlet cannot address itself.
4. I would like to take this opportunity to again identify the issues that must be addressed. These issues are:
  - submission of the 1995 Annual Report;
  - submission of the 1996 Annual Report (due March 31, 1997);
  - submission of an O+M plan for the operation of the solid and sewage waste disposal ;
  - submission of a plan for the disposal of screened sewage material;
  - placement of SNP station signs at stations 0779-1 and 0779-4, and;
  - warning signs at the water supply and waste disposal facilities.
5. While all points are equally important, if not all documents are submitted to the Nunavut Water Board with the 1996 Annual Report, please ensure that an update is provided to the Water Board describing the status and expected submission date of the various remaining documents. The last two points above noted issues can be effectively addressed in the summer.

6. The address of the Nunavut Water Board is:

Box 119  
Gjoa Haven, NT  
XOE 1J0

7. If you have any questions, or require additional information, please do not hesitate to contact me at the above address, or by phone at (819)-979-4405.

Sincerely,

Paul Smith  
Water Resources Officer  
Nunavut District
