Re: Extension to Water License for the in-town Waste Disposal Site Rankin Inlet

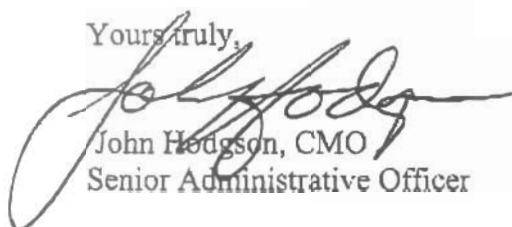

Dear Mr. Stewart;

The construction of the new Waste Disposal Site will be close to two years behind schedule and is just being finalized this fall. We will have to use the in-town site until the summer of 2006 and as such we require a one-year extension.

Our efforts over the last two years to acquire the necessary equipment required to maintain the road to this site have failed. We did receive; however, commitment from the Minister of C&GS advancing the main piece of equipment up from 07/08 to 06/07 in the Nunavut Capital Plan. I understand also that there is funding in the 07/08 Plan for the closure plan. C&GS looking for funding now to hire a consultant to come up with a 5 year closure plan.

A resolution of Council was passed at Council on September 8, 2005 approving this request. Please let me know if there is anything else required of me to obtain an extension.

Yours truly,

John Hodgson, CMO
Senior Administrative Officer
