Hi Bhabesh

- Block 20: Provide a summary of any consultation meetings including when the meetings were held, where and with whom. Include a list of concerns expressed and measures to address concerns

You wrote there that community meetings were held and some concerns were expressed. If you put something like that, you have to elaborate what kind of concerns.

That is minor and we can go on, but expect questions about it.

- Hydrological Assessment, for next time, when it was not required,

and you dont have yet done, better dont put there, otherwise I may consider incomplete and wait for the study.

- For now, I will proceed with the Licence process, but please, take note

Sonia

Hi Sonia,

Ans .1: Meeting with SAO on time to time regarding existing facilities related to licence. No public meeting is required because we are dealing existing facilities only.

Ans.2: Hydrology assessment was not asked as the requirement of this licence. Please proceed for public hearing right way.

Once this document is ready, we will submit later as the study document.

Thanks.

Bhabesh

Hi Daryl

There are a couple of questions I want to make to Bhabesh before going to the Tech Review period or may be you can help

I need to talk about the community meetings that were held related to this Licence, we may need a summary of concerns expressed by the people at the meetings, not very long or a sophisticated thing but something to know what happen there.

The second thing is about a hidrological study, I want to know who and for what it was requested as I dont find in my documents any reference for it. I dont think we can wait for it as it coming by the end of the month and will delay the process almost a month, but I need to know the importance of it

Thanks  
Sonia

Bhabesh, can speak to this better, but my understanding it was submitted complete a week or two ago

I might also add it was submitted last December, but because of sewage lagoon project, it had to be re-submitted...please correct me if Im wrong

The community is very much in need of this project, so I would hate to see it moved another year due to this

Thank you

**Subject:** Re: Sanikiluaq Water Licence

Good day, the latest information I have on the file is that a full application would be submitted by September 30th. To date this is an incomplete application. For further discussion on outstanding issues please contact the tech advisor on the file, Sonia Aredes.

Regards,

Ullukut Phyllis,

Is there any expected timeline on when the Sanikiluaq Hamlet water license (expired since March 31<sup>st</sup>, 2014) will be renewed?

The question has arisen because there is a sewage lagoon project expected to be tendered next year.

Hi David,

Phyllis B. is the Manager of Licensing of NWB who can direct your request.

Here is what I know:

Once a Licence is issued/renewed, AANDC inspector will be enforcing that licence.

Risk assessment of any licence is being done by the Licensee using inhouse staff or hiring a consultant.

Hope I could answer to your question.

Thanks.

Bhabesh

Bhabesh,

Who is the best person to contact at the NWB for an estimate/risk assessment of when the license will be renewed?

**Subject:** Sanikiluaq Water Licence

Hi Bhabesh,

We are anticipating that the Sanikiluaq Lagoon will be ready for tender next fiscal year. Sanikiluaq's current water licence expired on March 31, 2014. Can you please provide an update regarding the renewal of this licence?

Thanks,

Justine
