Seamless copper water tube (Alloy C12200) is certified by NSF to ANSI/NS Standard 61 for public water supplies. Water supplies with a pH level less than 6.5 may require corrosion control to limit the copper solubility in drinking water.

Wolverine third-party certified tube is manufactured to meet all requirements of the current revision to the applicable American Society for Testing and Materials (ASTM) specification. ASTM dimensions, and if necessary, weight tolerances are available upon request.

Residential

For portable water systems or servicing the residential fuel and gas industries, Wolverine Tube manufactures the right tube for all residential applications.

Commercial

Large and small diameter copper tube for various applications is readily available.

Wolverine manufactures all tube to meet exact standards and specifications.

Industrial

Customized to your specifications in an ever changing world, unique requests or everyday tube requirements are our specialty.
