Re: Request for Extension – Request for comments re: The inclusion and consideration of an un-engineered wetland area for the disposal of sewage for the Hamlet of Taloyoak for municipal License 3BM-TAL0813

Dear Robin Ikkutisluk:

Thank you for distributing GN-CGS application for consideration of an un-engineered wetland on behalf of the Hamlet of Taloyoak. Comments are due to the Nunavut Water Board (NWB) on January 6, 2014.

Aboriginal Affairs and Northern Development Canada (AANDC) would like to request an extension of **4 days** to complete a more thorough review of GN-CGS Hamlet of Taloyoak application for consideration of an un-engineered wetland with a revised submission date of January 11, 2014. Recognizing this application was submitted in early December and has coincided with the holiday break, AANDC would like additional time to review the “un-engineered wetland” system and provide a more thorough review and comments.

Thank you for your consideration of this request.

Should you have any questions or comments, please do not hesitate to contact me at (867) 975-4568 or by e-mail at Rory.MacDonald@aandc-aadnc.gc.ca

Regards,
