Good afternoon,

Does the GN or INAC have funding to assist small Inuit owned companies to purchase incinerators and other equipment as recommended so that we can be at the level of Multi-million dollar companies when it comes to best practices for the environment?

I was in Land use for 12 years with KIA and NIRB and the recommendations that are being made are definitely over the top.. I would suggest that the Feds or the GN consider giving some type of assistance to companies to go "ultra green" with their projects. One needs to understand what really goes on out in the field and the expenses incurred with projects in Nunavut. Striking a balance between environmental protection and economic development is difficult at best but there is no sense in trying to choke projects before they even get started.

Regards,

Ryan
