Good afternoon Ryan,

When do you expect to have the additional information for your water licence application? The application requirements are:

- A detailed spill contingency plan should be provided. The plan should include a title page, table of contents, dated prepared, effective date, background information on the site and project, emergency contact numbers, a detailed site map depicting spill kits, sumps, nearby water bodies, fuel caches, etc; measure to prevent and contain spills.
- Background information on the type of incinerator that will be used for combusting sewage and solid wastes should be provided.
- An abandonment and restoration plan (A&R Plan) should be provided.

Regards,
