Dear Manager of Licensing,

In adherence to the DND Commitment List, I am pleased to submit to the NWB for consideration both Commitments #6 & #7, that are due today:

No.	Party Responsible for Commitment	Party(s) who raised (Item#)	Issue - TM Commitment	Timeline for Submission	Form of Submission
6.	DND	CIRNAC ECCC	Provide preliminary Site Water and Runoff Management Plan. This plan will eventually be updated to include characterization of the flow and retention times in the sewage terraced system. NOTE: following submission of Desktop version of plans, updates based on fieldwork and actual site conditions to be provided within the initial 5-year term of the Licence.	April 30, 2019	Desktop versions of Plan to be provided, with "field tested" versions to be supplied later.
7.	DND	CIRNAC	Provide preliminary Sewage Sludge Management Plan NOTE: following submission of Desktop version of plans, updates based on fieldwork and actual site conditions to be provided within the initial 5-year term of the Licence.	April 30, 2019	Desktop versions of Plan to be provided, with "field tested" versions to be supplied later.

Please find attached the Preliminary Plans for #6 Water and Runoff & #7 Sludge Management. As a reminder note, these desktop version documents are high level plans that are pending on new infrastructure builds, future contract/consultant field works, weather conditions, and remote high arctic logistical challenges, that may affect timelines and scope; however, these preliminary plans are considered living documents that will be updated frequently and guide DND until the final formal Management Plans are established and delivered (by the 5 years) for full implementation.

As always, updated Preliminary Plans will be communicated and submitted by DND to the NWB when significant changes are made.

If you have any issues accessing the files, please do not hesitate to contact me.

Kind regards,

Andrew
